

VENTURE

The world's first fully integrated off-road helmet with built-in mesh intercom.
Built on the Leatt Moto 8.5 platform — powered by Cardo DMC.

\$799

MSRP | Available late summer 2026

ECE 22.06 & DOT

15-RIDER MESH INTERCOM

IP67 WATERPROOF

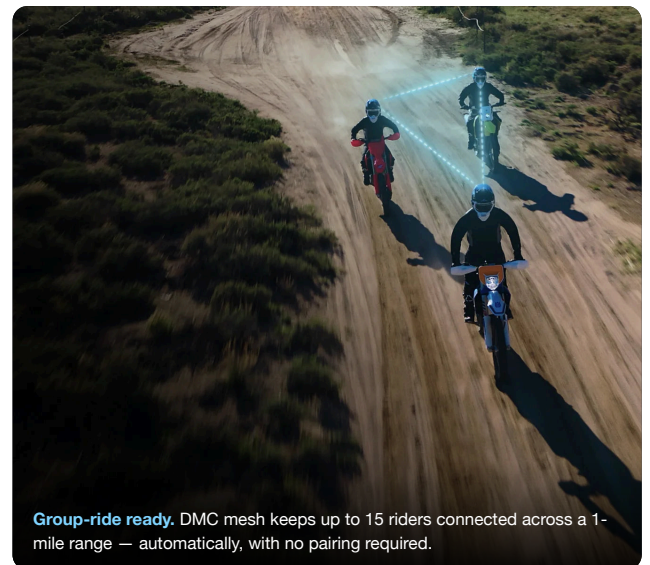

JBL 40MM AUDIO

1 MILE RANGE

5-YR SHELL WARRANTY

WHY IT'S DIFFERENT

- M** **2nd-Gen DMC Mesh Intercom**
Connects up to 15 riders, 1-mile range, self-healing — no manual re-pairing when riders drop out of line-of-sight.
- L** **Leatt Moto 8.5 Safety Platform**
Kevlar/carbon/fiberglass shell + 4-density EPS + 360° Turbine Technology to mitigate rotational & concussive impact.
- V** **Hands-Free "Hey Cardo" Control**
Natural voice operation for calls, music, and intercom — hands stay on the bars at all times.
- W** **IP67 Waterproof Electronics**
Fully sealed system survives 3 ft of water for 30 min — built for mud, rain, and river crossings.
- S** **JBL 40mm Sound + Bluetooth 5.2**
Immersive audio, phone calls, music/FM radio, plus Live Bluetooth Intercom with other major comm brands.
- T** **Fully Serviceable Electronics**
Every component — mic, battery, brain box — is removable and upgradeable with a standard T10 Torx bit.

Group-ride ready. DMC mesh keeps up to 15 riders connected across a 1-mile range — automatically, with no pairing required.

The Upsell Math

\$799

vs. Leatt Moto 8.5 (\$549) + premium bolt-on comm unit (\$850+ combined). Venture is a fully integrated package for less — and it looks better doing it.

Battery & Charging

6–13 hrs

USB-C quick charge: 20 min = 2 hrs of ride time. Charge-while-riding supported via power bank.

Warranty Coverage

5 / 3 / 1

Years on shell / electronics / battery (2-yr battery warranty in EU) — best-in-class peace of mind.

HOW TO SELL IT

- Lead with the hassle-elimination story.** No wire-routing through the liner, no bulky pod glued to the shell — it arrives ready to ride, balanced, and clean.
- Anchor on the ICP:** ADV/dual-sport groups, trail riders, and off-road coaches who need hands-free, real-time communication over long distances or during instruction.
- Reframe the price** as a bundle, not an add-on — a Moto 8.5-grade helmet *plus* a premium mesh comm system for less than buying both separately.
- Note the fit:** not a hard sell for race-day motocross (audio can be a focus distraction) — position for trail, ADV, and coaching instead.

OBJECTION HANDLING

- "What if the electronics break?"**
Every component is removable & serviceable with a standard T10 Torx bit — no full helmet replacement needed.
- "Will mud/sweat kill the electronics?"**
IP67-rated: submersible in 3 ft of water for 30 min. Liner and cheek pads snap out for washing.
- "My buddies use Sena — can I still talk to them?"**
Yes — Live Bluetooth Intercom connects with headsets from other major comm brands.
- "Isn't it heavy with all that tech?"**
1425g (M) fully loaded — lighter and better balanced than a standard helmet plus an external bolt-on pod.

ADV & Dual-Sport Riders — long-distance group communication

Off-Road Coaches — real-time, hands-free trail/track feedback

Early Adopters — first-ever integrated mesh off-road helmet
